### Tube for cutting spacers to the desired size

AISI304 Long

E001/6000(2.0) Ø 42.4 x 2.0 x 6000 mm

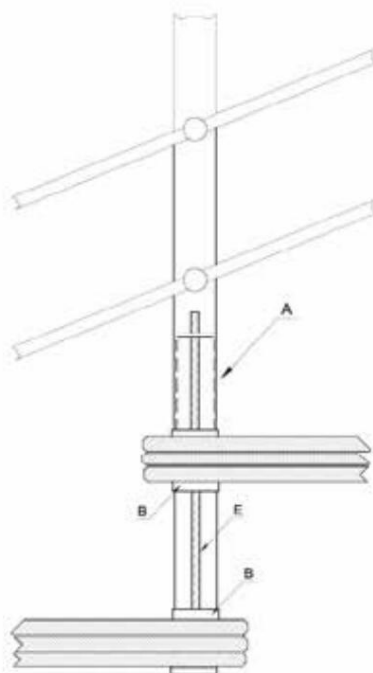

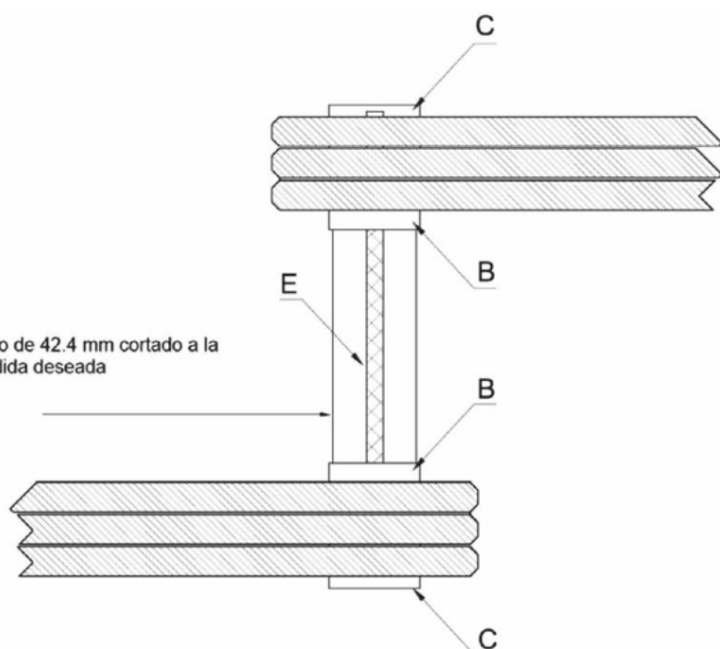

With the simple and economical Carbone Quickstairs system, you can immediately create staircases of any height and in different shapes: straight, L-shaped, U-shaped, and multiple combinations according to your needs. The stairs have a standard width of 1.10 m. The practical system allows you to adjust the height of the steps by cutting the 42.4 mm tube to the desired length. We have 32.28 mm safety glass treads for the most modern trends, and for those seeking the warmth of wood, we offer 45 mm thick beech wood with a natural finish that can be painted in the desired color. This revolutionary system allows you to complete staircases at an unmatched speed and cost. The best part is that this system is 100% compatible with the modular railing system you can find in this same catalog.
